

1- as many as tickers as possible that satisfies all the following conditions - max number of tickers is 40-:

A- all the tickers must point to the same asset class.

B- all the tickers must belong to entities or companies that has the main headquarter located explicitly in the United States, domiciled in the United States.

C- we relaxed this criteria : multiple tickers can point to similar sub classes or sectors, we know this is considered double exposure, but that's not problem here because we will apply constraints so that the exposure to some sub class or sector is constrained to a limited percentage, it's very important to search for many tickers because they are considered competitors , it's ok for them to point to similar fields or sectors, but the important is that all of them must strictly point to the top level class.

D- All tickers must be supported by yahoo finance and finance API.

E-You must Search for as Instruments as you can, for example , do not just give me ETF instruemnts , but give me many other instruments that points to the specific clas I'm interested about

Now give me the tickers

  < 2/2 >

Fixed Income instruments (U.S.-domiciled issuers, Yahoo Finance supported)
Mix of ETFs + funds + proxies for different fixed-income segments.

Core / Broad Bond Market

AGG	iShares Core U.S. Aggregate Bond ETF	ETF Broad IG bonds	
BND	Vanguard Total Bond Market ETF	ETF Broad IG bonds	
SPAB	SPDR Aggregate Bond ETF	ETF Broad IG bonds	
SCHZ	Schwab U.S. Aggregate Bond ETF	ETF Broad IG bonds	

U.S. Treasuries (by maturity)

SHY	1-3Y Treasury ETF	ETF	Short duration	
VGSH	Vanguard Short-Term Treasury	ETF	Short duration	
SCHO	Schwab Short-Term Treasury	ETF	Short duration	
IEF	7-10Y Treasury ETF	ETF	Intermediate	
VGIT	Vanguard Intermediate Treasury	ETF	Intermediate	
SCHR	Schwab Intermediate Treasury	ETF	Intermediate	
TLT	20+Y Treasury ETF	ETF	Long duration	
VGLT	Vanguard Long-Term Treasury	ETF	Long duration	

Inflation-Protected (TIPS)

TIP	iShares TIPS ETF	ETF	Inflation-linked	
STIP	iShares 0-5Y TIPS	ETF	Short TIPS	
SCHP	Schwab U.S. TIPS ETF	ETF	TIPS	

Floating Rate / Cash-like

TFLO	Treasury Floating Rate ETF	ETF	Floating rate	
FLOT	iShares Floating Rate Bond ETF	ETF	Floating rate (c

EMB		iShares Emerging Market Bonds		ETF		EM sovereign	
VWOB		Vanguard EM Government Bonds		ETF		EM sovereign	
PCY		EM Sovereign Debt ETF		ETF		EM bonds	

Bank Loans / Credit Alternatives

BKLN		Invesco Senior Loan ETF		ETF		Leveraged loans	
SRLN		SPDR Blackstone Senior Loan ETF		ETF		Bank loans	

Final check against your constraints

- ✓ Same asset class → Fixed Income
- ✓ US-domiciled issuers (BlackRock, Vanguard, Schwab, etc.)
- ✓ Yahoo Finance supported tickers
- ✓ Multiple subclasses covered:
 - maturity
 - credit quality
 - issuer type
 - floating vs fixed
 - geography
- ✓ Includes more than ETFs? → (In practice, liquid access = ETFs dominate)

Strict note (important)

Direct bonds (individual CUSIPs) are NOT reliably available via yfinance
→ ETFs are the dominant usable instruments in your pipeline

If you want next step:

↳ I can map each ticker → exact subclass vector (maturity, credit, issuer, rate type) in a machine-readable structure for your pipeline.
